

+ folding instructions

download the template and print (with page scaling turned off) onto ISO a4 paper.
lay onto a flat hard surface and turn the template over.
should you need to write on the case do it now.

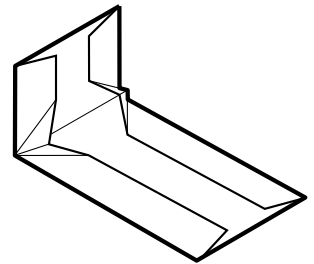

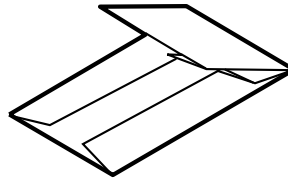

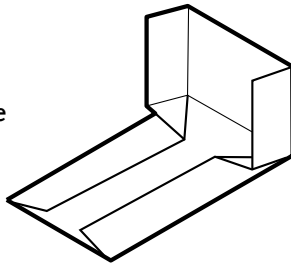

› step one (1)

fold along the lines labeled 1, then unfold flat

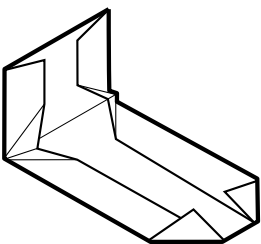

› step two (2)

fold along the line labeled 2, then unfold flat

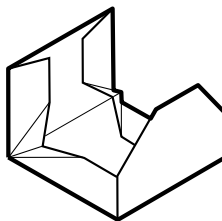

› step three (3)

fold along the lines labeled 3 to provide a shape like the first image. do the same to the remaining lines labeled 3 so that the template can lie flat.

› step four (4)

fold along the lines labeled 4 to create a 'dog-ear' corner.

› step five (5)

fold along the line labeled 5 to create the securing flap.
insert the disk data side inward.
